• Location for Mobile Database
(Specify a Shared Folder)

Creation of Mobile Deployment with DeployEZ

Mobile Deployment Created

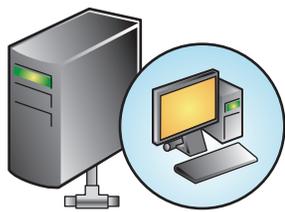

CONTENT of ZIP Archive:

- Govern.NET
- Resource Files
- Required System Files
- DB Structure

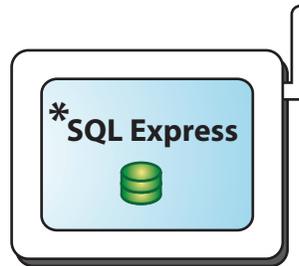

DB Detach process

Installation of Deployment on Mobile Device

Installation of Deployment
(Click on Shortcut)

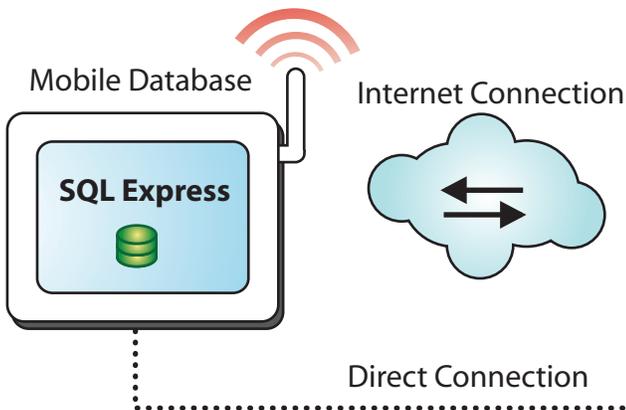

Installation of :

- Govern.NET
 - Resource Files
 - Detach from local SQL DB
 - Copy or Replacement of SQL .MDF and .LDF files
- SQL Attach to Mobile DB**

* RECOMMENDATION

SQL Server Express R2 recommended (10 GB limit)

SYNCHRONIZATION PROCESS:

Update Process during Synchronization:

Synchronization uses SQL Attach/Detach process; updates are flagged and a warning is displayed.

NOTE: A synchronization should always be performed prior to the DB Update otherwise all data on the Mobile Database is overwritten.
